SOFTWARE DEVELOPER | FULL-STACK • JAVASCRIPT • API DEVELOPMENT • REACT

Full-stack developer experienced in designing, developing, testing, and maintaining scalable web applications using modern JavaScript technologies. Skilled in writing and modifying software code, integrating APIs, and documenting technical solutions. AWS Cloud Practitioner certified with strong problem-solving ability and experience collaborating in fast-paced development teams.

CORE TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Python, SQL, PHP.

Frontend: React, React Native, HTML5, CSS3, SASS, jQuery, Bootstrap, responsive design

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MySQL, PostgreSQL, MongoDB, Query optimization

Cloud & DevOps: AWS, Docker, Git, GitHub, CI/CD pipelines

Security & Authentication: OAuth2, JWT authentication, SSL/TLS, Data Encryption

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (Project Team Lead)

Jan 2023 – Dec 2023

Helcim (Software Development Internship)

Winnipeg, Manitoba

- Developed, tested and maintained backend services integrating 5+ external APIs and relational databases supporting production applications used by 1,000+ users.
- Documented 10+ API workflows and technical integrations, improving onboarding efficiency for new developers.
- Analyzed and validated thousands of database records to troubleshoot production issues and maintain data integrity.
- Debugged backend services through log analysis and issue tracing, helping reduce resolution time for production incidents.
- Prepared technical documentation and API integration reports to support developer onboarding and maintenance of production systems.
- Collaborated with cross-functional teams to identify technical problems and deliver reliable software solutions.

Freelance Full-Stack Developer

July 2021 – Present

Self-Employed

Winnipeg, Manitoba

- Developed backend services integrating 4+ external APIs and relational databases, supporting production web applications used by 1,000+ users.
 - Designed 5+ relational database schemas, improving query performance and enabling reliable data storage and retrieval.
 - Optimized SQL queries and data validation workflows, improving application response time and data accuracy across multiple projects.
 - Developed 10+ responsive React UI components and application pages, ensuring cross-device compatibility and improved front-end performance.
-

EDUCATION

Bachelor of Science- Applied Computer Science- GPA: 3.45

September 2020 - February 2025

University of Winnipeg

Winnipeg, Manitoba

SOFTWARE PROJECTS

WeatherMass – Dynamic Weather Tracking Platform | React, Node.js, Visual Crossing API

- Built backend services that ingest external weather API data, clean and normalize datasets, and prepare structured data for analysis and application use.
- Implemented automated processing to structure forecast datasets for frontend visualization.

Concertix – Event Tracking Platform | React, Node.js, Express, MongoDB, MySQL

- Developed a full-stack event tracking platform with MongoDB and MySQL database integrations.
-

CERTIFICATIONS

AWS Cloud Practitioner | AWS Developer Associate (in progress)
