**SOFTWARE DEVELOPER | FULL-STACK WEB DEVELOPMENT | APPLICATION SUPPORT**

## PROFILE

- Software Developer with an Applied Computer Science background, one year of internship experience, and freelance experience since 2021 building responsive web applications, REST APIs, backend services, and database-backed workflows.
- Skilled in JavaScript, TypeScript, React, Node.js, Express.js, Python, PHP, SQL, MongoDB, MySQL, PostgreSQL, Git/GitHub, Postman, AWS, testing, debugging, and technical documentation.
- Built and maintained 20+ web applications while applying responsive design, accessibility awareness, reusable components, API integration, authentication workflows, and structured troubleshooting.
- Communicates clearly through status updates, implementation notes, troubleshooting records, and documentation for clients, developers, QA, analysts, and support teams.

## CORE TECHNICAL SKILLS

**Front End Development:** UX/UI fundamentals, HTML5, CSS3, JavaScript, React, Vue awareness, responsive design, accessibility, reusable UI components

**User-Centric Design:** usability, user-centricity, hierarchical information organization, consistent design patterns, clear user control, context-aware design

**Server-Side Development:** Node.js, Python, PHP, REST APIs, web service design, JSON, API-connected pages, database-supported workflows

**Authentication and Authorization:** OAuth awareness, JWT, sessions, authorization, secure API access, authentication-aware workflows

**Version Control and Delivery:** Git, GitHub, GitLab awareness, CI/CD concepts, Docker, Kubernetes, VS Code, Postman

**Testing and Maintenance:** browser testing, Postman testing, regression checks, bug reproduction, website maintenance, deployment troubleshooting

## PROFESSIONAL EXPERIENCE

### Freelance Full-Stack Developer

Self-Employed

**July 2021 – Present**

Winnipeg, Manitoba

- Built, designed, and maintained 40+ responsive websites and web applications using HTML, CSS, JavaScript, TypeScript, React, Node.js, Python, PHP, SQL, MongoDB, MySQL, and PostgreSQL, delivering user-centric tools across business, creative, and personal project needs.
- Applied UX/UI principles including clear navigation, responsive layouts, consistent design patterns, accessibility awareness, reusable components, and hierarchical organization of information, improving usability across 20+ projects.
- Developed reusable UI components, API-connected pages, authentication-aware workflows, backend logic, and data-supported features from project requirements, improving consistency and maintainability.
- Tested and debugged 50+ frontend, backend, API, database, configuration, and deployment issues using browser tools, Postman, logs, SQL checks, and structured reproduction steps, improving reliability and website maintenance.

### Full Stack Developer Intern (Project Team Lead)

Helcim (Software Development Internship)

**Jan 2023 – Dec 2023**

Winnipeg, Manitoba

- Developed, tested, debugged, and maintained React, Node.js, REST API, and MySQL-backed features for production applications used by 1,000+ users, supporting reliable customer-facing workflows.
- Integrated 5+ external APIs and documented 10+ workflows, implementation notes, troubleshooting steps, and technical processes, improving maintainability for developers, analysts, QA, and support teams.
- Queried and validated thousands of MySQL records to troubleshoot production issues, confirm data accuracy, identify root cause, and support reliable application and reporting workflows.
- Tested backend endpoints in Postman by validating request payloads, response bodies, status codes, authentication scenarios, JWT-style access patterns, and edge cases, helping identify defects before release.

## SOFTWARE PROJECTS

### EmoticonQuotes – AI-Assisted Quote and Developer API Platform

March 2026

React, Node.js, Express.js, MongoDB, REST APIs, Clerk, Stripe, AWS

1. **Challenge:** The platform required secure user access, saved content, developer API keys, subscriptions, usage limits, and AI-assisted content retrieval within one maintainable Internet-based application.
2. **Action:** Built responsive React interfaces and modular backend services, implemented API-key workflows, JSON data validation, semantic matching, subscription webhooks, and database-backed access rules.
3. **Result:** Delivered a multi-tier application supporting 10 mood experiences, saved quotes, usage limits, secure developer access, and maintainable frontend and backend workflows.

### WeatherMass - TypeScript API Data Platform

September 2025

React, Node.js, TypeScript, REST APIs, Visual Crossing API, WeatherAPI

1. **Challenge:** External weather services returned hourly and weekly forecast data in inconsistent formats, creating unreliable frontend display patterns.
2. **Action:** Developed TypeScript and Node.js workflows that normalized API responses, validated required values, handled errors, and delivered structured JSON to responsive React components.
3. **Result:** Produced a reliable application that displayed consistent forecasts across devices and established a scalable foundation for recommendations and reporting features.

### Concertix - Event Tracking Platform

December 2024

HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, REST APIs (Ticketmaster), Nunjucks

1. **Challenge:** Users needed a simple way to search and browse concert/event information from an external event API while keeping results organized, searchable, and easy to view.
2. **Action:** Built a Node.js and Express.js application that integrated the Ticketmaster API, processed event data, rendered dynamic pages with Nunjucks, and stored/retrieved event related records using MongoDB.
3. **Result:** Delivered a functional event discovery platform that displayed structured concert information, improved event search usability, and strengthened backend API integration and database workflow experience.

## EDUCATION

Bachelor of Science Degree - Applied Computer Science  
University of Winnipeg

September 2020-February 2025

## CERTIFICATIONS

AWS Cloud Practitioner Learning plan (Completed)  
AWS Developer Associate Learning Plan (Completed)  
Mastering JavaScript and jQuery

February 2026

June 2026

August 2025
